

# Prior Authorization Copilot

## Autonomize AI | Prior Authorization Copilot

Immediate Impact: Faster Turnaround · Thousands of Hours Saved ·  
Significant Cost Reduction · Increased Compliance

### The Problem: Costly Manual Reviews

Current prior authorization (PA) processes increase costs, delay care, and hurt efficiency:

#### High-Cost Employee Utilization

- Clinicians spend excessive time on manual tasks, increasing labor expenses

#### Process Inefficiencies and Friction

- Unstructured data (faxes, PDFs, handwritten notes) causes errors and delays.
- Fragmented member data leads to unnecessary denials and rework.

#### Delayed Decisions Impacting Care

- Manual reviews delay treatment, as well as worsen care outcomes and member satisfaction.

### The Solution: Autonomize AI's Prior Authorization Copilot

Autonomize AI transforms PA workflows with healthcare-native Compound AI:

- Instant Data Extraction: Eliminates manual entry and converts unstructured data into actionable insights.
- Multiple Data Sources: Unifies relevant data for faster decisions.
- Clinical Summarization: Contextualizes and auto-summarizes medical charts for rapid review.
- AI-Powered Compliance: Evaluates requests against Carelon, InterQual, and internal guidelines with human oversight.
- Seamless Integration: Easily connects to claims, UM, and EHR systems.
- Transparent Recommendations: Links AI outputs to original data for verification.
- Proactive Care Intelligence: Detects care gaps to boost quality metrics and STAR ratings.

# Proven Results for Leading Health Plans

Results Delivered	Impact Achieved
55% Faster Processing	Decision times cut from 35 to <15 mins
76% AI Intake Automation	Eliminates costly manual entry
36,000 Clinical Hours Saved	Millions in savings from FTE time recouped
16% Compliance Boost	Improves accuracy & reduces rework
Enhanced Member Experience	Faster approvals & better outcomes

*Autonomize AI is going to be a game changer for Prior Auth and Utilization Management; we can be #1 in the industry with this. This is very strategic for the business.*
